PRESS RELEASE

Tradestar Corporation Announces First Oil Sales From Karnes County Project

HOT SPRINGS, Ark., Feb. 22 /PRNewswire-FirstCall/ -- Tradestar Corporation (OTC Pink Sheets: [TIRR - News](#)) today announces the first sales of oil from its 4 well field in Karnes County, Texas. Since completing the rework project in early February, Tradestar has sold a total of 529 barrels of oil at \$44 per barrel.

Initially expected to yield 30 barrels of oil per day, the Hysaw-Hobson prospect has exceeded company expectations by 30%. Tradestar acquired the field in September 2004 and began recompletion efforts in early January 2005. The field, which had not produced more than 8 barrels of oil per day since 1997, is now producing 38-40 barrels of oil per day, and more than 1,200 barrels of oil per month.

Tradestar CEO Tom Feimster stated, "This is a proven example of our strategy to acquire properties with production from shallow to medium depths which offer lower geologic and mechanical risk by use of improved operating practices and by aggressively developing reserve potential. Our policy is, and always will be, to invest only in existing wells with proven production so that our risk is not 'if' we will recover oil or natural gas, but 'how quickly' we will recover it, and thus recoup our initial investment. We executed that strategy perfectly in Karnes County."

About Tradestar Corporation

Tradestar Corporation is an independent energy company that is engaged in the exploration, development, exploitation and acquisition of on-shore oil and natural gas properties in conventional producing areas of the United States. The company was incorporated in the State of Oklahoma in 1982. Tradestar strives to enhance asset value by expanding oil and natural gas reserves, raising production levels and increasing cash flow. Tradestar intends to foster its growth as an independent oil and natural gas company by investing in only proven producing wells. The company's web site is <http://www.tradestar-corp.com>.
